

Building Trust. Empowering Choice. Enabling Responsible Health Data Use.

CONSENTIS is an EU-funded project developing a next-generation consent management framework for the use and reuse of health data
Putting individuals at the centre of health data governance

OUR VISION

A trusted health data ecosystem where citizens are empowered to make informed choices about how their data is used, while enabling innovation, improving healthcare and advancing research in a secure and compliant way

THE CHALLENGE

Health data is among the most sensitive personal data. Managing consent across multiple stakeholders, systems and borders is complex

- Fragmented and static consent models
- Limited transparency and control
- Difficult to demonstrate compliance
- Barriers to data sharing and innovation

OUR SOLUTION

CONSENTIS delivers an interoperable, scalable and citizen-centric consent management framework that connects identity, consent and data access in a trustworthy way

KEY FEATURES

Citizen-Centric Consent

Individuals can provide, manage and withdraw consent for specific data, purposes and organizations - at any time

Trusted Identity & eID Integration

Leverages electronic identification (eIDAS) and trust services for high-assurance identity and legally compliant consent

Self-Sovereign Identity (SSI)

Empowers citizens with control over their identity credentials and supports selective disclosure and user sovereignty

Privacy-Enhancing Technologies (PETs)

Applies PETs to enable secure data sharing, minimize re-identification risks and support privacy by design and by default

Interoperability by Design

Built to integrate with healthcare systems, healthcare insurance providers and national or cross-border data spaces

BENEFITS FOR ALL STAKEHOLDERS

HEALTH AUTHORITIES & POLICY MAKERS

- Harmonised consent governance
- Compliance with GDPR, EHDS and national laws
- Stronger public trust and transparency

HEALTHCARE PROVIDERS

- Clear, enforceable consent rules
- Seamless integration in clinical workflows
- Greater patient trust and engagement

DATA PROTECTION OFFICERS & LEGAL TEAMS

- Verifiable consent records and audit trails
- Reduced compliance burden
- Support for DPIAs and regulatory audits

CITIZENS

- Real control over health data
- Clear information and transparency
- Confidence in how data is used

HOW IT WORKS

- 1. Identify** User authenticates via eID or SSI credential
- 2. Consent** User provides granular consent for specific data and purposes
- 3. Enforce** CONSENTIS enforces consent policies across systems
- 4. Monitor** Users can review, modify or withdraw consent anytime

TRUSTED BY DESIGN

CONSENTIS is built on European values:

- ✓ Privacy & Data Protection
- ✓ Transparency & Accountability
- ✓ Security & Resilience
- ✓ Interoperability & Portability
- ✓ Ethics & Human-Centricity

OUR IMPACT

CONSENTIS supports the creation of a sustainable health data ecosystem that:

- ✓ Respects fundamental rights
- ✓ Enables better healthcare and public health outcomes
- ✓ Drives research and innovation
- ✓ Strengthens Europe's digital sovereignty
