CONSENTIS

Identity And Consent Management for EU Digital And Data Strategies

1 THE CHALLENGE

Every day people share personal data across many services and sectors, and often lose visibility and control over who uses their data, for what purpose, and for how long.

2 INFORMED CONSENT

CONSENTIS develops clear, granular, and revocable consent mechanisms so each person can easily decide how, when, and with whom their information is shared.

3 SELF-SOVEREIGN DIGITAL IDENTITY

The proyect promotes reliable and interoperable digital identities aligned with eIDAS 2.0, so people remain in control of their credentials and digital atributes.

4 INTEROPERABILITY

CONSENTIS connects contexts, technologies, and administrative domains, making secure and seamless data exchange possible across services and sectors.

5 PRIVACY, SECURITY AND COMPLIANCE

The framework combines privacy, traceability, security and compliance with GDPR and European data strategies, reinforcing trust in digital services.

6 EUROPEAN IMPACT

CONSENTIS contributes to a more trustworthy and transparent European data economy by promoting secure information sharing, responsible innovation and greater citizen control.
